

# SIEMENS

Heater to billing service:  
Have used 345 KWh of heat...

Thermometer to weather service:  
It's only 2 degrees up here...

Car to mobile phone:  
Help, I'm being broken into!

## Now the streets are paved with new business ideas.

Organizer to theatre: Please book  
two tickets and direct debit them...

Navigation system to underground car-  
park: I'm almost there. Where can I park?

Wireless modules from Siemens give you scope for lots of new business ideas. And they provide you with the opportunity to greatly reduce your development cycle as our modules can be integrated quickly and easily. With Siemens as your partner, you benefit from our competence in GSM and DECT technology. We provide a complete selection of high-performing radio modules for intelligent communication solutions between machines, computers, vehicles, measuring devices and persons. Do you already have an idea? We will be happy to provide you with our Application Engineering support for the integration into your solution. All over the world.
